[Docket No. 960621181-6181-01]
RIN 0651-AA89

Elimination of Requirement for Proof of Service in Consented Requests for Extensions of Time to File a Notice of Opposition

Agency: Patent and Trademark Office, Commerce.
Action: Final Rule
Summary: This rule deletes the requirement for proof of service when a request for an extension of time to oppose registration of a trademark is based upon a statement that applicant has consented to the request. This rule will simplify opposition proceedings by eliminating an unnecessary requirement.
Effective Date: July 15, 1996. This rule will be applicable to all relevant correspondence filed with the Office on or after the effective date.
For Further Information Contact: David Sams by telephone at (703) 308-9330, by facsimile transmission at (703) 308-9333, or by mail marked to his attention and addressed to the Assistant Commissioner for Trademarks, Box TTAB, 2900 Crystal Drive, Arlington, Virginia 22202-3513.
Supplementary Information: Section 2.102(c)(2), which provides for an extension of time for filing an opposition under 37 CFR Part 2, is revised to delete the requirement that proof of service be included in consented extension requests. This change permits potential opposers to request an extension of time to oppose aggregating more than 120 days from the date

of publication based on a written statement that the applicant or its authorized representative has consented to the request. The Office believes that the requirement for proof of service is unnecessary when the applicant has assertedly consented to the filing of the extension request. The Trademark Trial and Appeal Board sends a copy of the request together with the Board's action thereon to the applicant, which may file a request for reconsideration of the Board's action if necessary.

The Patent and Trademark Office has determined that this revision is procedural and remedial in nature, and this revision is therefore being published as a final rule. 5 U.S.C. 553(b)(3)(A) & (B). This rule is not a significant rule for the purposes of Executive Order 12866. No notice of proposed rulemaking is required for this rule under 5 U.S.C. 553 or any other law, so a regulatory flexibility analysis is not required and has not been prepared. 5 U.S.C. 603(a).

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
